Automation Innovator with extensive experience in Selenium (Java), TestNG, Cucumber, web and REST API testing, specializing in Telecom (CRM, BRM, Finance) and healthcare applications.

Education

- 2017: Executive MBA from IIM - 'C'
- 2012: B.Tech from SRM University - Chennai

Core Competencies

Automation Strategy Development

Team Leadership and Mentoring

Process Improvement Initiatives

Quality Assurance Best Practices

Agile Methodologies

Risk Management in Testing

Test Strategy & Planning

API & Web Services Testing

Performance Testing Techniques

Defect Tracking and Management

Stakeholder Communication

Profile Summary

- Automation Framework Specialist with expertise in **designing, developing & implementing end-to-end automation frameworks** using Selenium, TestNG, and Cucumber, ensuring efficiency and scalability in software testing processes.
- Technical Leadership and Mentorship:** Proven capability to **lead and mentor diverse teams, fostering a culture of excellence by developing automation strategies**, adopting best practices, and ensuring the delivery of high-quality outcomes.
- Skilled in **test planning, execution, migration & defect management**, with proficiency in Agile & Scrum methodologies, ensuring timely project delivery & stakeholder collaboration.
- Innovative Problem Solver:** Developed customized automation tools, such as **advanced PDF verification systems and solutions for BRM CDR rating and reconciliation**, driving accuracy and operational excellence.
- Process Optimization and Efficiency:** Identifies inefficiencies in manual testing processes and drives automation solutions, significantly reducing testing time and manual effort, such as automating audit report verification and CDR activities.
- API Testing and DevOps Knowledge:** Experienced in API automation testing with hands-on exposure to Jenkins, Docker, Kubernetes, and AWS Cloud, enabling seamless integration of automation with DevOps pipelines for enhanced delivery workflows.

Technical Skills

- Automation Testing:** Selenium WebDriver, Cucumber BDD, TestNG, Automation Framework Design.
- DevOps & CI/CD:** Jenkins, Docker, CI/CD, GitHub.
- Cloud & Infrastructure:** AWS Cloud Services, Shell Scripting, API Testing.
- Programming & Scripting Languages:** Java.
- Tools & Technologies:** Salesforce CRM, JIRA.

Career Timeline

Aug'12 - Apr'22 | Accenture | Assistant Manager

Since Apr'22 | Tech Mahindra | Technical Lead

Achievements

Best Team Player Award at Tech Mahindra (08/2025) for exceptional collaboration and support.

Most Humble Team Lead Award for fostering a positive and respectful team environment.

Pat on the Back Award at Tech Mahindra (05/2025) for helping the team achieve targets effectively.

Night Owl Award at Tech Mahindra (11/2024) for successful automation of test cases, meeting customer expectations.

Accenture Celebrate Excellence Award (10/2021) for creating the NVT tool, saving 70% of manual effort.

Personal Details

Address: Hinjewadi, Pune
Languages Known: English and Hindi

Work Experience

Since Apr'22 | Tech Mahindra | Technical Lead

- Contributed to an end-to-end automation framework for Salesforce CRM applications, covering over 1,000+ test cases to enhance efficiency and reliability.
- Maintained and enhanced the automation framework, leading a team of 18 to develop and implement new automated scripts, driving efficiency and scalability in testing processes.
- Spearheaded the identification and automation of manual testing processes, achieving significant improvements in operational efficiency & adherence to automation best practices.
- Prepared comprehensive high-level and detailed test estimates for manual and automation testing, ensuring precise project planning and resource allocation.
- Delivered daily, weekly, and monthly progress reports to senior client management, showcasing leadership in transparent communication and project alignment.
- Automated an advanced tool for seamless audit report PDF verification, driving innovation and reducing manual intervention.

Aug'12 - Apr'22 | Accenture | Assistant Manager

- Played a key role in testing activities, leading the automation POC, estimation, planning & kickoff for VATS, achieving the automation of 2,000+ test cases while ensuring streamlined execution.
- Migrated 2,000+ test cases from JBehave (BDD) to TestNG framework, defining testing methodology, creating test plans & validating web-based applications to increase testing efficiency.
- Automated critical processes, including CDR opening, verification, reconciliation, BRM CDR rating, payments, and adjustments, resulting in significant time and effort savings.
- Guided and mentored the team to resolve technical issues, collaborated with DevOps and development teams for quick root cause identification, and innovated tools to eliminate manual efforts, optimizing operational workflows.
- Presented Automation Testing innovations at Accenture CMT-level exhibitions, showcasing expertise in automation practices across Telecom domains, including Billing and Revenue Management (OBRM), Mobile Networking, Siebel CRM, and OSS/BSS systems.
